The rules require a registration credential for various building contactors who are involved in the construction or modification of public buildings and places of employment and one- and 2-family dwellings, unless the contractor already holds another type of contractor credential issued by the department. The type of contracting businesses required to be registered under the rules include commercial general construction, drywall, plastering, electrical wiring, finish carpentry, flooring, framing carpentry, glass and glazing, insulation, masonry and stone work, plumbing, concrete work, roofing, siding, building site preparation and/or stabilization, structural steel, tile and terrazzo, wall coverings, and other building or equipment specialties.  The department estimates that there would be 30,000 contracting businesses that would be required to obtain registrations. The department proposes to charge \$100 for a 4-year, building contractor				
registration. There is also a \$15 initial application fee that would be waived if the applicant applies and pays for the registration via the internet. The department estimates that it would realize approximately \$806,250 in revenue annually.				
The department anticipates that the workload associated with this registration can be managed with information technology usage and within current staff levels associated with the administration of the commercial building code program and the one- and 2- family dwelling code program.				
Long-Range Fiscal Implications No long range fiscal implications are anticipated.
